Tube cutting machine RS 8

PRINT

Vertical 8-heads indexing motion machine with horizontal glazing unit for the production of tubular glass blanks

Technical Data

■ Operating range

Working range: \varnothing 6 - 22 mm
alternative: \varnothing 18 - 35 mm
alternative: \varnothing 25 - 42 mm
other working ranges on request

Length of finished blank:

min. 30 mm cylindrical length

max. 100 mm total length

higher total length on request

For the production of tubular glass blanks with one or two glazed ends.

■ Output

Up to 3.600 pieces per hour depending on the diameter of the glass.

■ Dimensions and weight

Length: 1.400 mm

Width: 1.060 mm

Height with tube
feeder: 3.600 mm

Weight: 900 kg

■ Consumption

Consumption values for gas, air and oxygen depend on the glass tube and the type of gas used. Detailed information will be supplied on request.

■ Automatic tube feeder with magazine

Magazine above the chucks with a total storage capacity of 8 glass tubes.

Alternative: 1 tube feeder RZ with magazine

■ Option

Tube feeder type RLG for feeding the glass tubes into the magazine of the machine directly from tubing bundle.
